

# Web Site Testing Checklist

(Part of: Samah Zahalka)

## 1. Client Side Testing

### 1.1 Usability

#### 1.1.1 General

- ☐ Can the typical user run the system without aggravation?

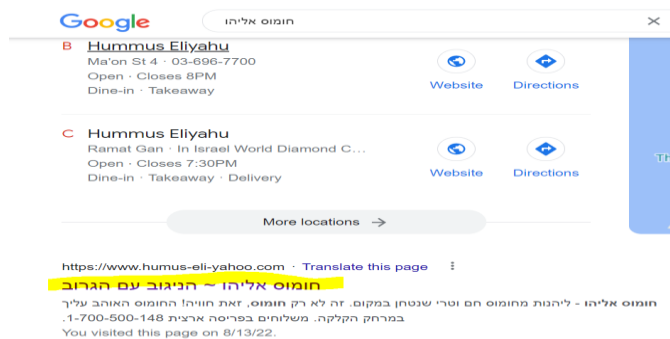

Yes, a typical user can run the system, without aggravation.

- ☐ Is it easy to learn and use?

Yes, it's clear.

- ☐ Is the website searchable?

Yes, it appears easily in Google search, it's comes the third/forth result in search.

- ☐ Are the instructions on how to use the site clear to the user?

Yes, all the actions are Bold and clear.

- ☐ If you follow each instruction does the expected result occur?

Yes, when we follow the instructions we get to the expected results.

- ☐ Is all terminology understandable for all of the site's intended users?

Yes, the site has a clear vision, and story that it's understandable.

- ☐ Can you get to your desired location with 4 or less clicks from the Home Page?

Yes, I might get to buy a meal from the menu within 4 clicks.

- ☐ Is contact information for the site owner readily visible and available (name, telephone number, email address, mailing address, fax number)?

The contact information is missing the Fax number.

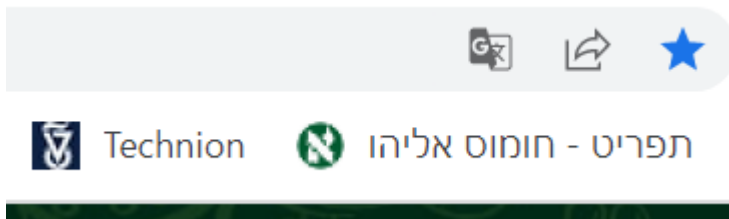

☐ If a user wishes to bookmark a page, is the page name easily understandable?

Yes, it is understandable when the page is bookmarked.

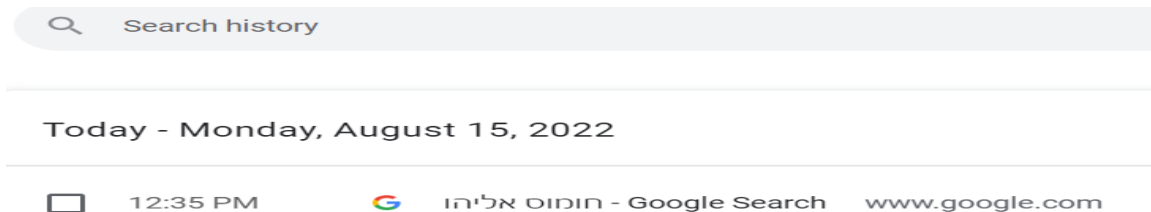

☐ If a user wishes to add a page to his Favorites list, is the page name easily understandable?

Yes

☐ Does your site's Web address appear in the History list if the user allows for historical page recording?

Yes

☐ Is data that is requested of the user essential to the process for which it is requested? For example do you need a user's date of birth in order to process his book order or are you simply asking for too much user information?

There's not much user information needed, only the details of the location.

## 1.1.2 Design

### 1.1.2.1 GENERAL

☐ Is page layout consistent from page to page?

Yes

☐ Is each page organized in an intuitive manner?

Yes

☐ Is the page background (color) distraction free?

Yes

### 1.1.2.2 GRAPHICS

☐ Are graphics used consistently?

No

☐ Are graphics optimized for quick downloads?

Yes

☐ Are all graphics properly aligned?

Yes

## הסיפור

בשנת 2008 אליהו יצא למסע אחר החומוס המושלם. במהלך הדרך חקר אליהו מה הוא שומשום איכותי ואיך בעצם הופכים את הזרעים הקסומים הללו ל-100% טחינה גולמית משובחת. מה החשיבות של כמות הטחינה מול כמות גרגרי הזבל, מה ההבדל בין זני חומוס כאלו לזני חומוס אחרים, מה הם השילובים הנכונים ליצירת מתכון מנצח. לאחר ניסיונות ודרך ארוכה, הגיע אליהו ליצירת המתכון של החומוס המושלם.

☐ Do all the images add value to each page, or do they simply waste bandwidth?

It adds value, to the theme of the restaurant

☐ Are graphics being used the most efficient use of file size?

Most efficient.

☐ Does text wrap properly around pictures/graphics?

Yes ,Also I think there's might be a need to add pictures especially within the menu

☐ Are images displayed at their defined location? Are they correctly sized?

Correctly sized.

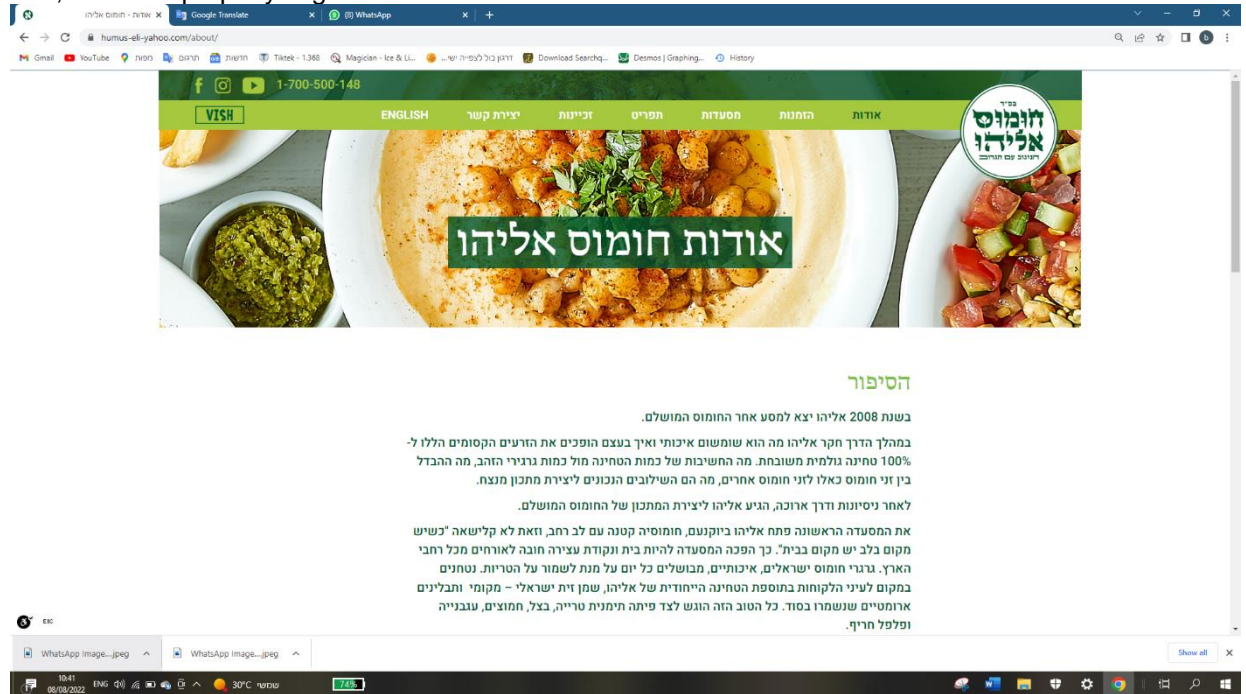

(Part of: Ben Dadon)

### 1.1.1.1. OTHER

#### 1.1.1.1.1. Text

☐ Is all text properly aligned?

Yes, all text is properly aligned.

☐ Do pages print legibly without cutting off text?

Yes, pages are print without cutting of text.

- ☐ Are all referenced web sites or email addresses hyperlinked?  
The email addresses are hyperlinked

הודעה \*

אנא ציינו את שם הסניף במידה ורלוונטי לתוכן ההודעה

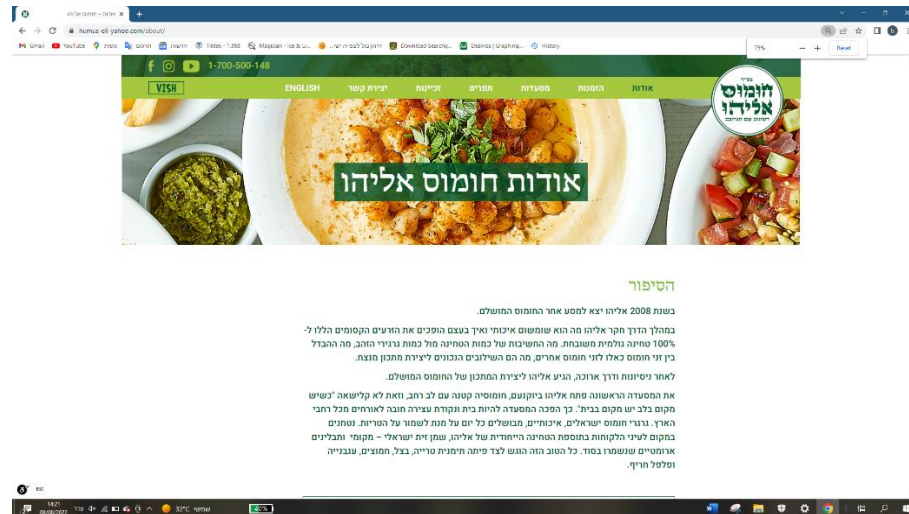

But not all the referenced web sites are hyperlinked.

### 1.1.1.1.2. Font

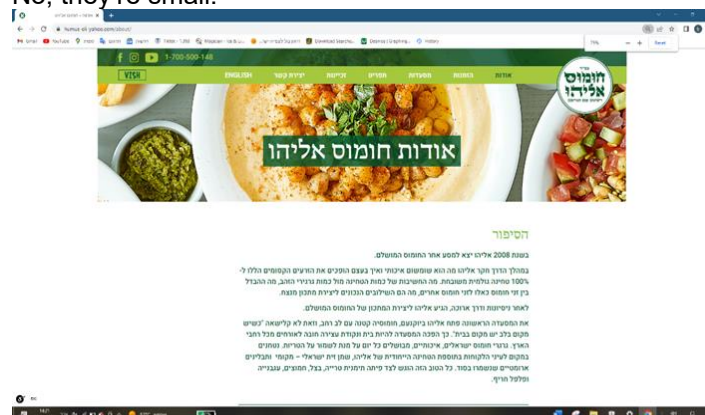

☐ Are fonts too small to read (remember not everyone may have the same vision...)?

Yes, they're at 75%. At first we thought the fonts is fine but now we're expecting for a Larger fonts.

☐ Are fonts too large?

No, they're small.

☐ Does your solution require special fonts?

No. our solution isn't require special fonts.

### 1.1.1.1.3. Tables

- ☐ Are all of the parts of a table present? Correctly laid out? Can you confirm that selected texts are in the right place?

Yes, we can confirm all of the part of the table are correctly laid out.

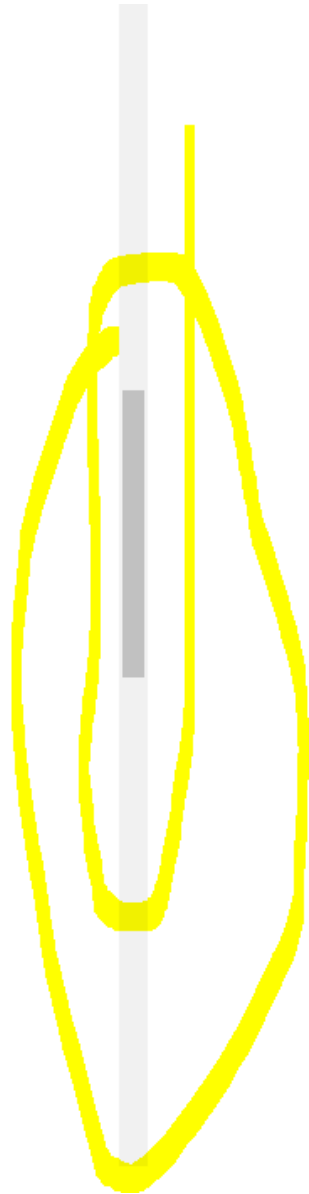

חומר	חומר
27/32	החומר העליון
30/34	החומר העליון / חומר / חומר
40/44	החומר העליון

34/39	החומר העליון
32/36	החומר העליון

Yes, the user can scroll to the right to see items in a table

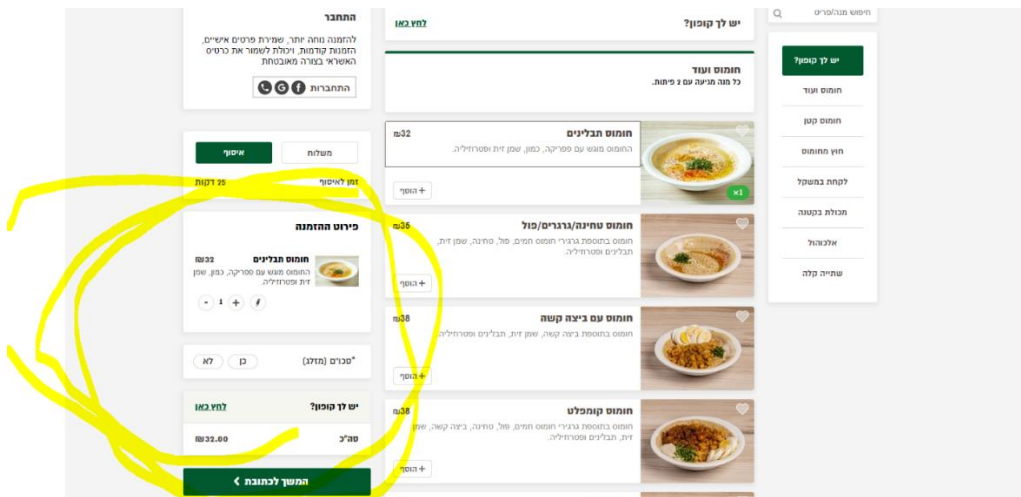

☐ Do tables print out properly?

Yes

☐ Are certain rows excessively high because of one entry?

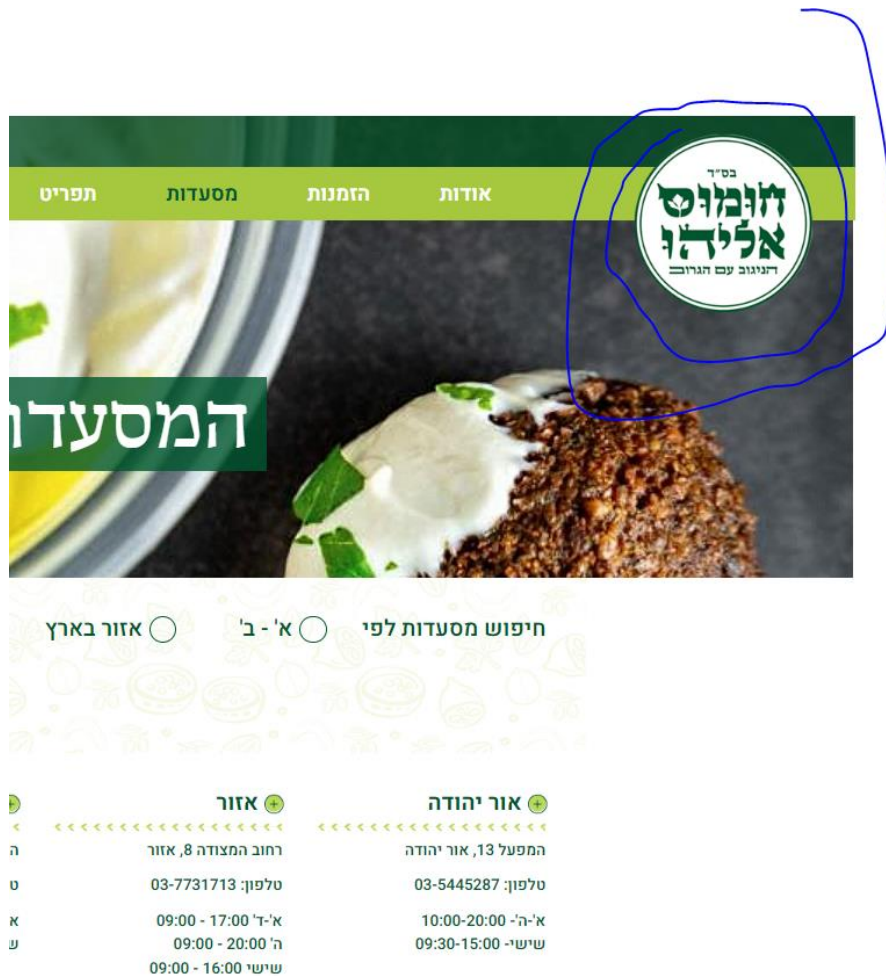

Yes

The screenshot shows the website of the Ministry of Health, specifically the 'מסעדות שלנו' (Our Restaurants) section. The header includes the Ministry of Health logo and navigation links in both Hebrew and English. The main banner features a close-up image of a plate with hummus, pita, and falafel. Below the banner, there is a search bar and a list of restaurants categorized by type (e.g., 'אזור יבנה', 'אזור תל אביב'). Each category lists several restaurants with their names, addresses, and phone numbers.

### 1.1.2. Links

☐ Is there a link to home on every single page?

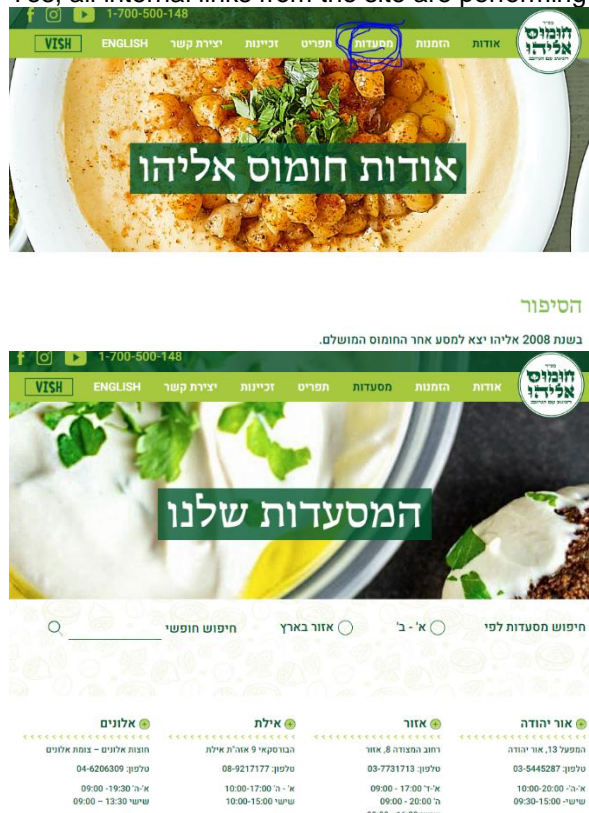

Yes.

- ☐ Are all internal links performing correctly (Does a link bring you to the page it said it would?)?

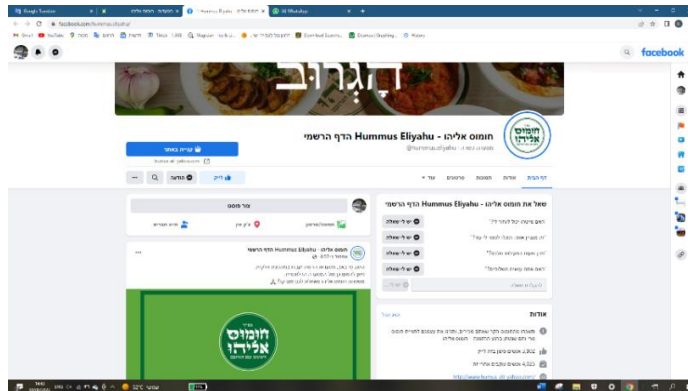

Yes, all internal links from the site are performing correctly:

- ☐ Are all external links performing correctly?

Yes, all external links are performing correctly:

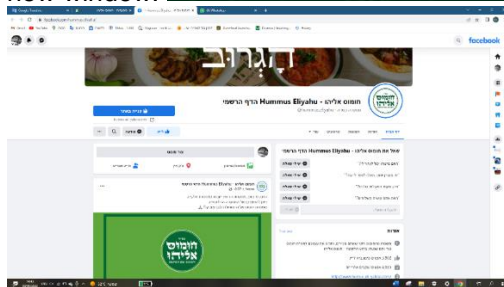

- ☐ Do all links achieve target as defined (new window, same window, specific location on a page)?  
all the links achieve as same window, except the external links and orders (new window)

new window:

Same window:

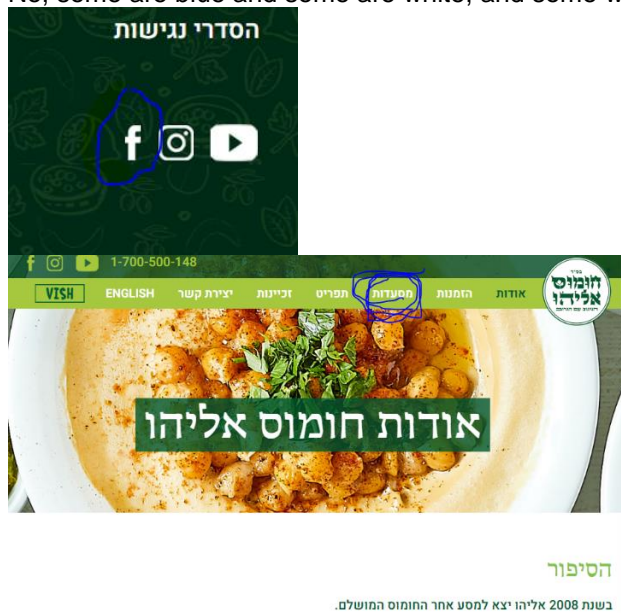

## הסיפור

בשנת 2008 אליהו יצא למסע אחר החומוס המושלם.

☐ Are hyperlink colors standard?

No, some are blue and some are white, and some with a logo.

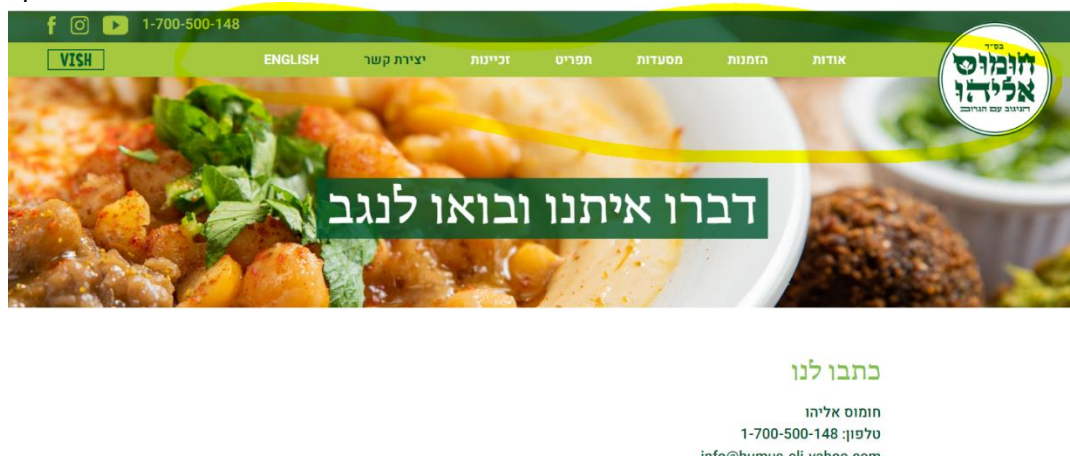

- ☐ Does each hyperlink work on each page?  
yes. After full checking of the site we can confirm that each hyperlink work on each page.
- ☐ Does the page you are linking to exist? Are there any broken links?  
No, we haven't found any broken links and we all links are exist and working currently.

### 1.1.3. Navigation

- ☐ Is a navigational bar present on every screen?  
Yes, there's a navigation bar on every screen.

- ☐ Is the navigation bar consistently located?  
The navigation bar is placed consistently everywhere on the site.
- ☐ Can a user navigate using text only (Tab button, text input)?  
No, there's no text input but you can use the Tap Button on from the Navigation bar options.

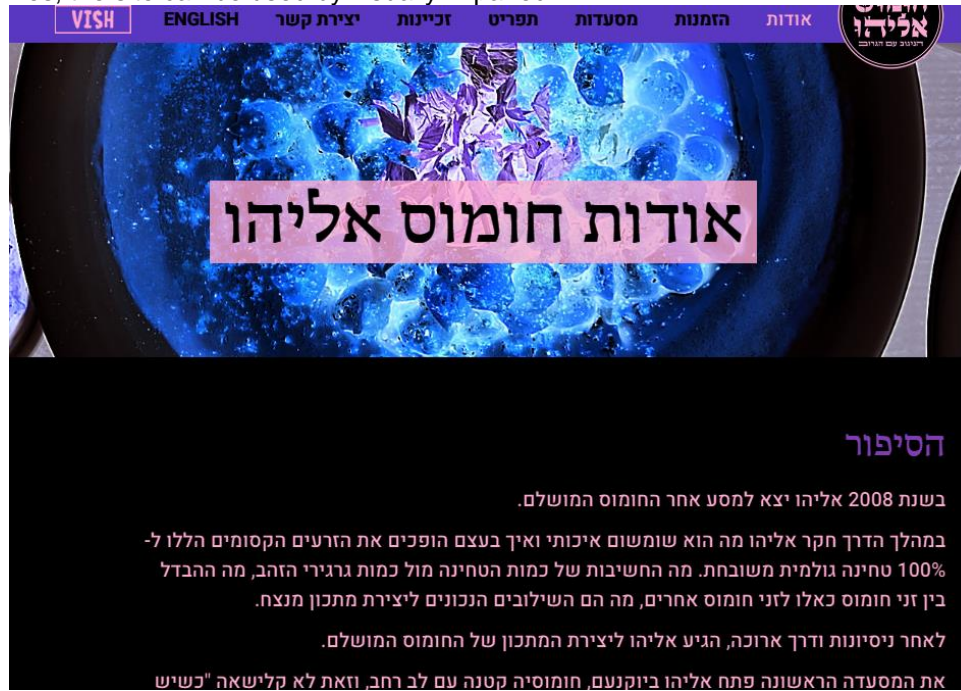

- ☐ Can a user navigate without the use of a mouse?  
Nope :(

☐ Can your site be used by the visually impaired? Red/Green Color-Blind, less than 20/20 vision, etc.

Yes, the site can be used by visually impaired.

☐ Does tabbing work consistently, in a uniform manner?

Yes, all tabbing work consistently way.

(Part of: Adolpho Liberman)

## 1.2. GUI

### 1.2.1. Fields

☒ Can text be entered in numeric fields?

On page (Contact Us) text can be used in numeric fields, and numbers can be written in text fields that shouldn't be able to, like name. When you send it, it sends without catch any of these problems. (BUG)

☒ Can wildcards be used in searches?

You can right wildcards in searches, but not find anything when used.

☒ Can spaces and blank values be entered in fields?

Yes, spaces and blank values can be entered in fields. And after that when you try to send, it really sent it. (BUG)

☒ Do fields allow for the maximum amount of text to be entered?

Yes the fields allow to text the maximum amount of characters.

☒ Are the initial values of checkboxes and radio buttons correct?

On the website do you have only the radio button option and works correctly, checkboxes we have on the orders, and works correctly too.

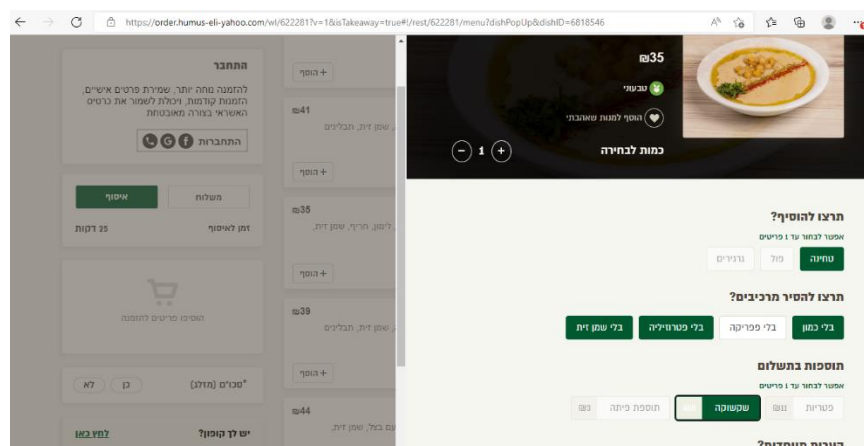

☒ Are you restricted to only selecting one radio button in a group at one time?

Yes in the website is restricted to only selecting one radio button in a group at one time.

☒ Do check boxes trigger the desired event?

The checkboxes that we have on the website is in the orders, where being able to select which ingredients you want in your order.

☒ Is intelligent error handling built into your data verification? IE. If Date of Birth is a required field MM/DD/YYYY, it is unlikely that the person entering the data was born in 1857.

☒ Does the Back button work as intended? It should not open a new browser window, redirect you to another site, prevent caching such that the Back navigation requires a fresh trip to the server; all hypertext navigation should be sub-second and this goes double for backtracking

☒ Does content remain if you need to go back to a previous page, or if you move forward to another new page?

## Other

Yes, all the texts of the web site can be copied and paste it on another place.

# Story

Along the way, Eliyahu researched what quality sesame is and how to actually turn these magical seeds into 100% fine raw tahini. What is the

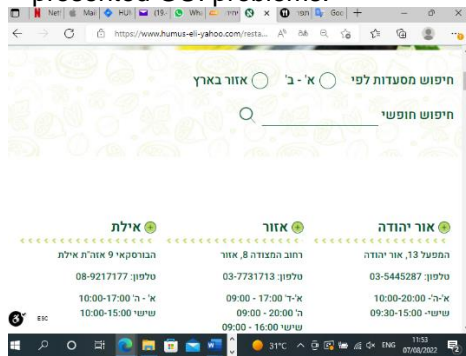

importance of the amount of tahini versus the amount of gold berries, what is the difference between such chickpea varieties and other chickpea varieties, what are the right combinations to create a winning recipe.

### 1.3. Compatibility

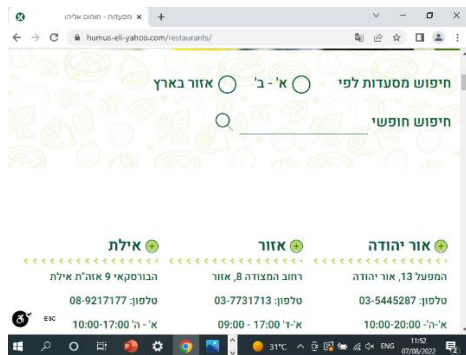

#### 1.3.1. Resolution

☒ Does the site look good on 1024x768, 600x800 etc.?

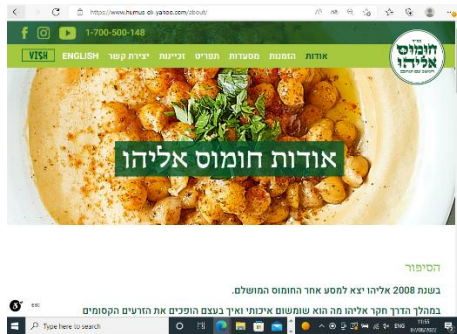

The site has been approved on the resolution test, checked with (Internet Explorer and Google Chrome). Both sites in the both browsers do not broken the format, and has not presented GUI problems.

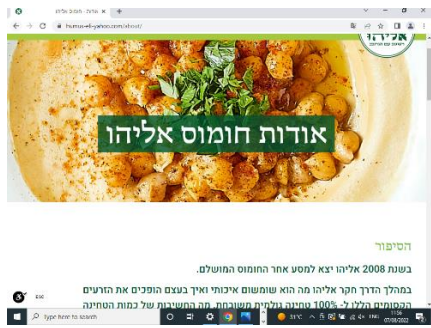

Resolution Test 800 x 600 - approved (Internet Explorer)

Resolution Test 800 x 600 - approved (Google Chrome)

Resolution Test 1024 x 768 - approved (Internet Explorer)

Resolution Test 1024 x 768 - approved (Google Chrome)

### 1.3.2. Browsers

☒ Have all supported browsers been tested?

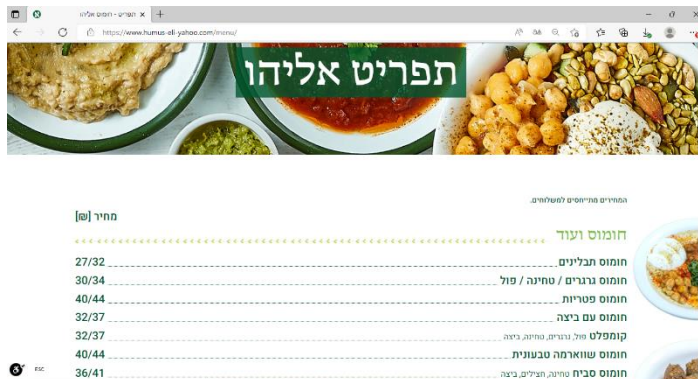

Yes, we have tested in the following browsers (Internet Explorer, Google Chrome, Safari) and the test has been approved in all the browsers.

☒ Do images display correctly with browsers under test?

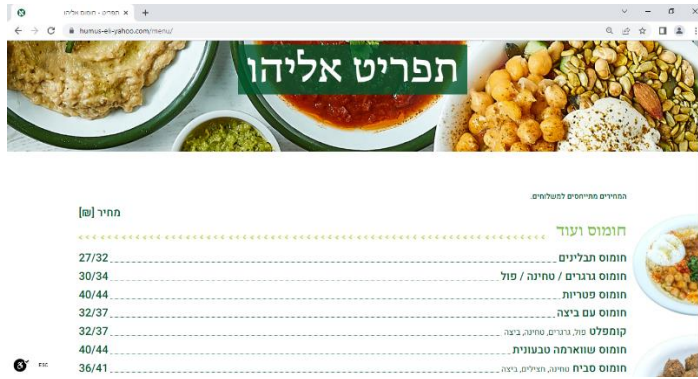

Yes, all images appear correctly without breaking the pattern.

☒ Have you verified that fonts are usable on any of the browsers?

Yes, and all the fonts are the same in all the browsers.

Images e text test (Internet Explorer)

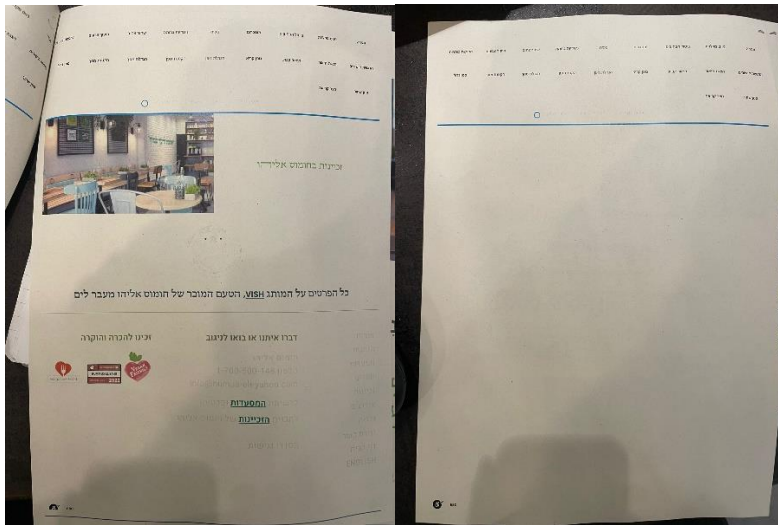

Images e text test (Google Chrome)

☒ Have you printed your site's content from various browsers?

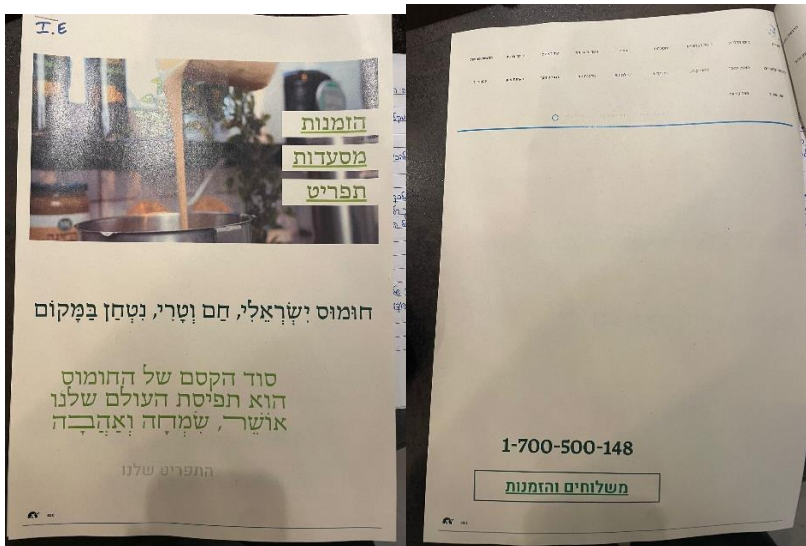

Yes, I have printed from (Internet Explorer, Google Chrome), and the result isn't the same, they broke pattern, and some of informations/ images are not printed.

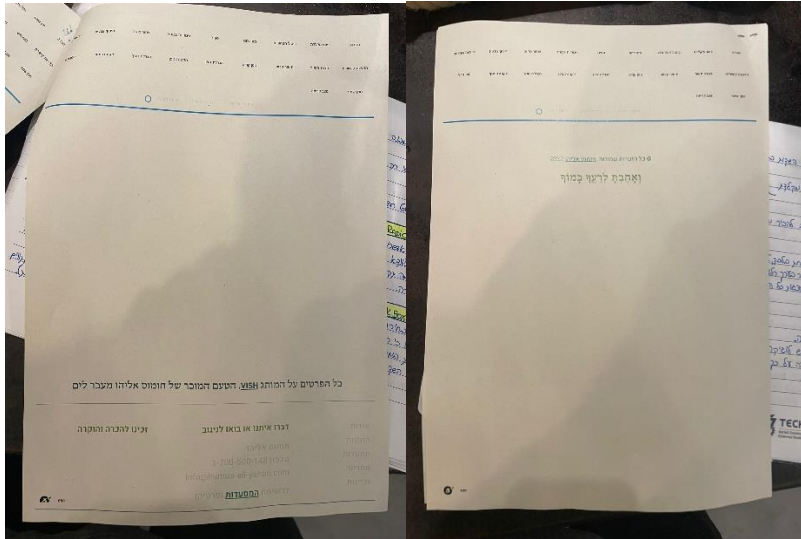

Printed from Browser - Google Chrome.

Printed from Browser – Internet Explorer.

☒ Have you tested graphic images across browsers?

Yes, all the graphic images that have on the website works correctly, with the same resolution.

(Part of: Agne Klimita)

## 2. Server Side Testing

### 2.1.Connectivity

Is information archived and easily retrievable?

לא רלוונטי.

Does the home page load quickly?

כן זה לוקח רק 2-3 שניות, תלוי במהירות של האינטרנט.

### 2.2.Data Verification

לא תינתן התייחסות לנושא זה בהנחיית מנהל הפרויקט.

Is the accuracy of stored data sustained?

Has data been verified at the workstation?

Has data been verified at the server?

Have you ensured that what the user is entering on the workstation is yielding the right information on the server?

### 2.3.Security

#### 2.3.1. General

Can the accuracy and trustworthiness of the system easily be confirmed?

כן, אחרי מספר בדיקות שונות שנעשו במהלך הפרויקט ניתן לסכם שאתר אמין.

Are you prevented from entering the same information multiple times (order forms, free samples, etc.)?

Is a unique identifier assigned to each user entering form data?

לא

רלוונטי

Does the application include time-outs due to inactivity?

מבדיקה שנעשתה אחרי שעתיים באתר ללא שימוש לא היה פסק זמן או התרעה אחרת עקב אי פעילות.

### 2.3.2. User Login

Does the site prompt for user name and password?

באתר הנבדק אין אפשרות להקים משתמש.

Are concurrent log-ons permitted?

לא רלוונטי

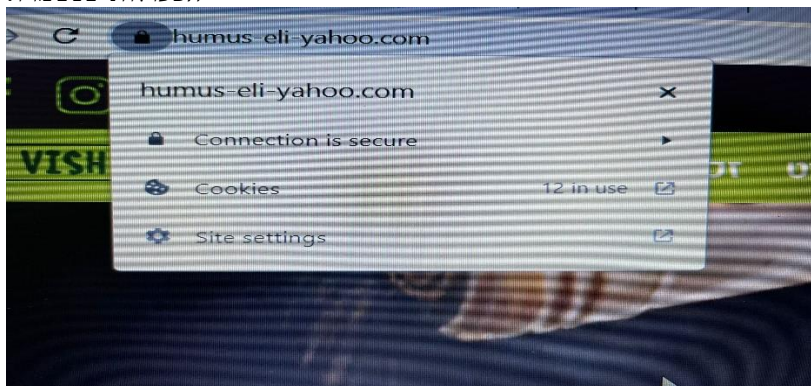

Does your server lock out an individual who has tried to access your site multiple times with invalid login/password information?

לא רלוונטי

### 2.3.3. Cookies

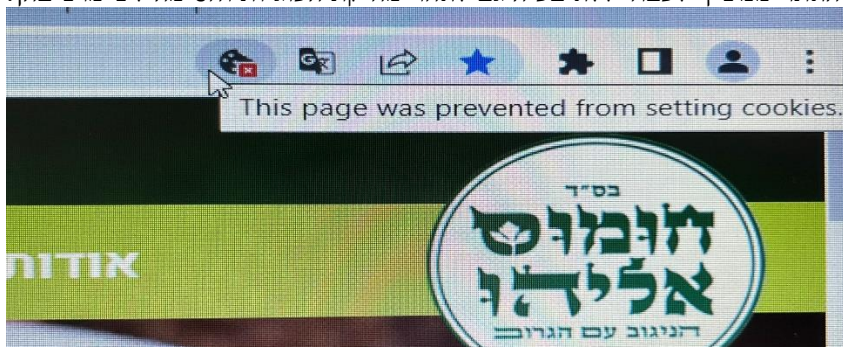

Does the solution require cookies?

אחרי מספר פעמים שמחקתי את ההיסטוריה מדפדפן ונכנסתי לאתר, לא התבקשתי לאשר שמירת עוגיות, אך אחרי כמה דקות של הימצאות באתר ראיתי שבשורה עליונה רשום שאתר משתמש בעוגיות ויש רשימת הפעולות שנשמרו.

Does the solution work even if users disable cookies?

כן, האתר ממשיך לעבוד ללא בעיה גם לאחר מחיקת העוגיות וחסימה לשימוש בהן.

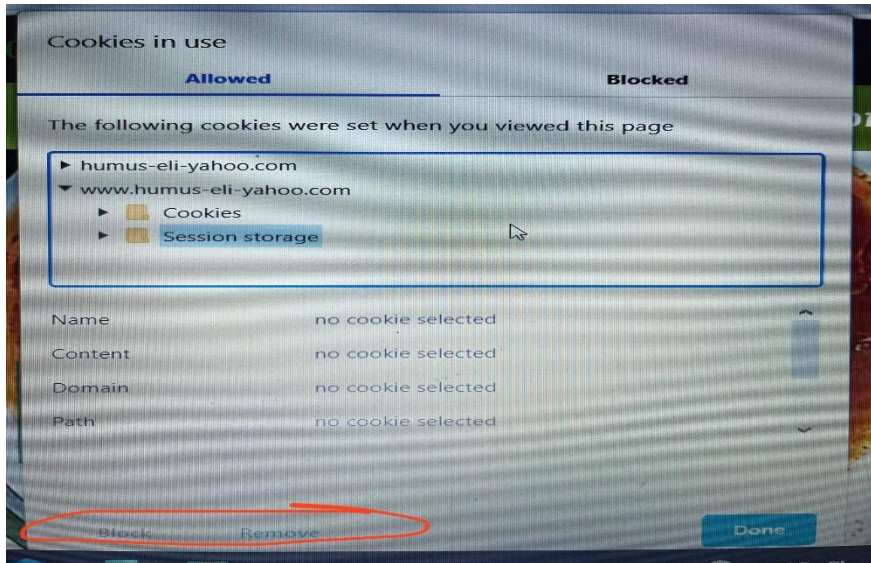

Has information stored in cookies been verified?

Is cookie information being incremented properly?

Have you prevented cookies from being editable by the user?

למשתמש יש אפשרות למחוק או לחסום את החלק מעוגיות או את כולן.

Have you checked to see what happens if a user deletes cookies while in site?

משתמש יכול להמשיך להשתמש באתר ללא בעיה כל שהי וללא התרעה על כך שעוגיות נמחקו.

Have you checked to see what happens if a user deletes cookies after visiting a site?

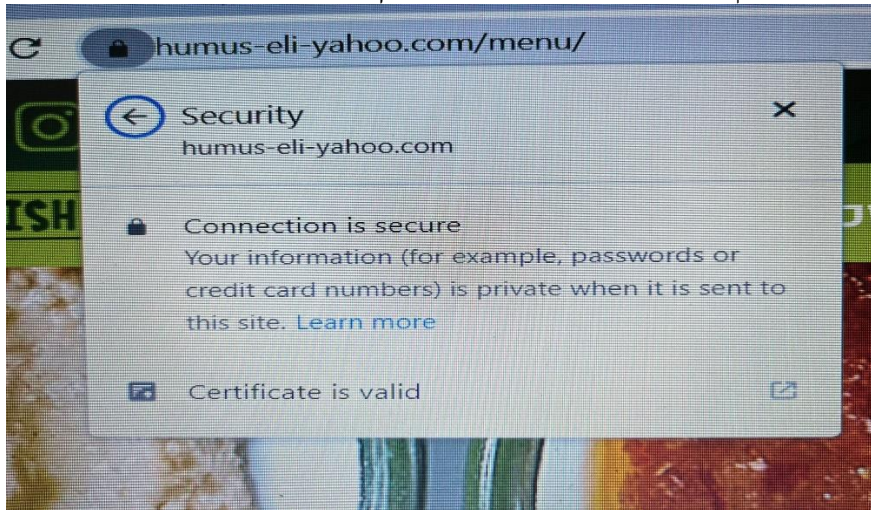

בכניסה הבא לאתר משתמש מקבל התרעה שעוגיות נמחקו ולכן יש צורך לעשות רענון לאתר.

#### 2.3.4. Secured Pages

Is bookmarking disabled on secure pages?

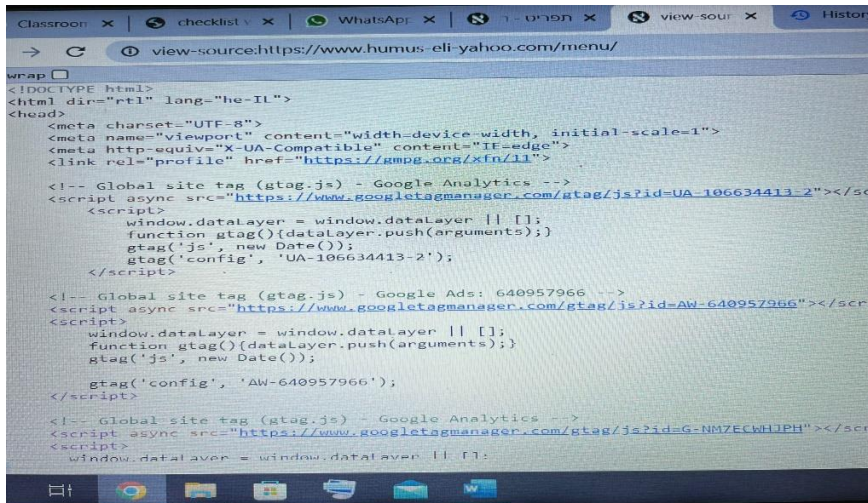

Does the key/lock display on status bar for insecure/secure pages?

ליד הלינק של האתר בצד שמאל מופיע סימן של מנעול שאומר שאתר מאובטח:

Is Right Click, View, Source disabled?

לא. לאחר קליק ימני ולחיצה על כפתור המדובר, נפתח עמוד נפרד שבו מופיע את המידע הבא :

Do your users know when they are entering or leaving secure portions of your site?

## 2.4. Performance

Can the system work effectively for one user, ten users or a thousand?

באפשרותנו לבדוק את הפעילות של המערכת בזמן שמשתמשים בה כ-10 לקוחות בו זמנית. במהלך הבדיקה אתר עבר כנדרש ללא בעיות. מכיוון שרשת חומס אליהו מאוד מוכרת ויש לה עשרות סניפים בכל הארץ, ניתן לצאת בהנחה שהרבה מאוד לקוחות משתמשים בה בו זמנית במהלך היום וגם בשעות העומס ובמהלך הבדיקות ראינו שאין תקלות שקשורות לכמות המשתמשים.

Does the system operate in the same way across different computer and network configurations, platforms and environments, with different mixes of other applications?

במהלך הפרויקט השתמשנו במחשבים ודפדפנים שונים על מנת לבצע בדיקות הנדרשות באתר. לאחר הבדיקות שבוצעו לא נמצאו הבדלים בפעילות האתר בפלטפורמות שונות כולל בזמן השימוש בעוד מערכות במקביל.

Does the system meet its goals for response time, throughput, and availability?

בהחלט, זמן תגובה של המערכת היא מיידית וכל הפעולות מתבצעות במיידית ללא עיכוב (אלא אם כן יש בעיה בחיבור לאינטרנט).

## 2.5. Load/Concurrent Usage

Is the system able to handle extreme or stressful loads?

לא רלוונטי.

### 1.4. Volume

- ☐ Can the site sustain short periods of usage at high volume?
- ☐ Can the site sustain large transactions without crashing?

### 1.5. Stability

- ☐ Is the system able to continue operating correctly over time without failure?
- ☐ Can the site sustain long periods of continuous usage by 1 user?
- ☐ Can the site sustain long periods of usage by multiple users?

#### 1.5.1. Recovery

- ☐ If the system does crash, are the re-start and recovery mechanisms efficient and reliable?
- ☐ If you leave the site in the middle of a task does it cancel?
- ☐ If you lose your Internet connection does the transaction cancel?
- ☐ Does your solution handle interruptions in file transfer?
- ☐ Does your solution handle browser crashes?
- ☐ Does your solution handle network failures between Web site and application servers?
- ☐ Does your solution handle the database server becoming inaccessible?
